

KARNATAKA

Home to the information technology revolution that fundamentally altered the way India is perceived globally, this state, without any doubt boasts of a galaxy of good institutions. The venerable Indian Institute of Science is located at Bangalore, the state's capital, but since it does not offer BE/B.Tech it does not find a mention here. With the recent introduction of private universities, quite a few marque engineering colleges like Peoples Education Society Engineering College (PESIT), M S Ramaiah college of Engineering and others have transformed into universities. The state also boasts of being home to BMS college of Engineering, Bangalore, the first institution in the private sector to be accredited as a Tier -1 institution under the Washington Accord.

Technology

The regulatory agency like AICTE should be an agency to set standards for technical education. Model curriculum benchmarked with curricula of standard organisations of national/international importance should be made available through AICTE

Dr Vinod V Thomas
Director,
Manipal Institute
of Technology
(MIT)

An Engineering college's role is mainly to prepare graduates for career opportunities in discipline-specific, multi-disciplinary, inter-disciplinary and trans-disciplinary fields. Entrepreneurship is to be given due importance as the future of the country is mainly dependent on more job creation
