Making institutions keep their promises

Promising and progressing the quality of management education is definitely in the hands of accreditation agencies. Eminency and authenticity of education which a student receives at a university or other higher level institution can be deliberated by an accreditation council. It is both the course of action to review institutions and prominent status to receive the award - "accredited status". It boosts assurance that the presentation of education by the institution is fair and truthful together with description of services available to students and the accomplishments of its graduates.

The accreditation provided by the council is valued high since it is a neutral and external party based upon appropriate peer expertise. It means that a student can be confident enough that a degree or credential he is receiving from the accredited institute has value, So, "Accredited status" means that students and public can expect that the institution live up to their promises. G
