

Enabling students to become industry-ready from campus to corporate

◀ **ABHAY G. CHEBBI**

Pro-Chancellor
Alliance University

Investments in education reap the maximum dividends as it enables future generations to develop skills that will generate lucrative employment opportunities globally. Educational institutions like ours have a responsibility to provide an industry-ready curriculum with inputs from practitioners and subject matter experts. Industry partnerships for creating centers of excellence, joint research opportunities, and student training on contemporary technologies is the need of the hour and we at Alliance have responded to this through strategic partnerships with Airbus, Wipro, Intel, Oracle, and a consortium of corporate members - ABB Robotics, Sie-

mens, Systema (SAP), Adroit-ec Engineering Solutions (PTC Gold Partner), under the aegis of AMS India, to name a few. Beyond this, providing mentorship opportunities, hands on learning through application-based education, live projects and internships at leading multinationals are all imperative to provide holistic development, enabling students to become industry-ready enabling an easy transition from campus to corporate.
